TECHNICAL NOTE

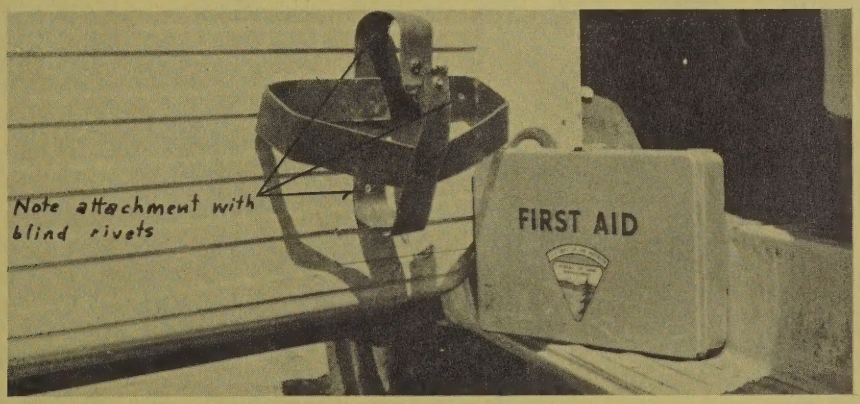
U.S. DEPARTMENT OF THE INTERIOR – BUREAU OF LAND MANAGEMENT

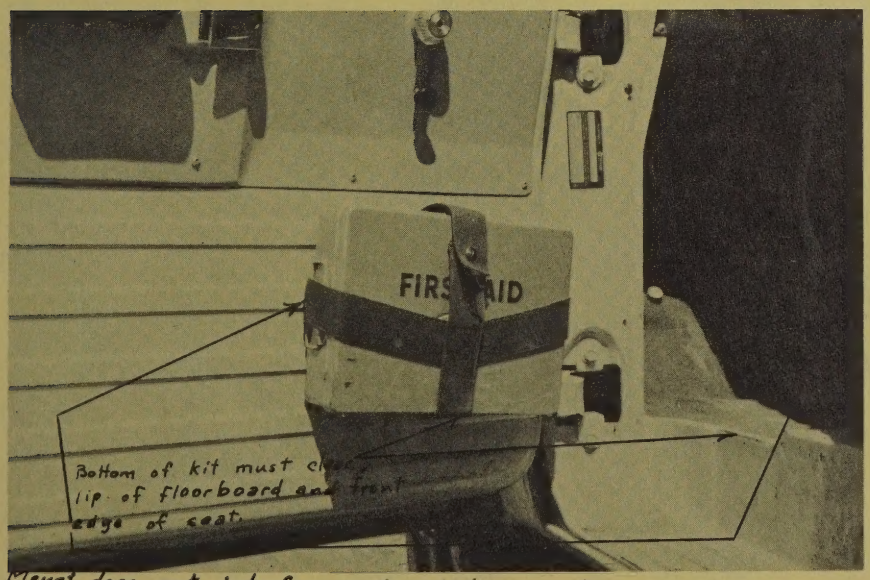
VEHICLE MOUNTS FOR FIRST AID KITS

Michael Rutledge from the Worland District has submitted an employee suggestion for mounting first aid kits in vehicles.

The suggestion provides for the kits to be mounted on the door kick panel in such a way as to prevent interference with driver and passenger occupancy of the vehicle, eleminates rattles, and reduces dirt and damage to the contents. This type of mounting improves accessibility of the kit for emergency use.

The following photographs illustrate the mounting of webbing material on the door panel and with the first aid kit in place. Offices considering the maintenance of kits in vehicles a problem may wish to consider how Worland has solved theirs through this simple procedure.





Mount does not interfere with vehicle operation in any way.
